

SERVICE ADVISORY

NO.: 1479 Rev A

TO: Owners/Operators of the GTN 6XX/7XX Units

DATE: December 22, 2014

SUBJECT: GTN 6XX/7XX Catalog Flight Plan Menu Preview

AFFECTED PRODUCTS

All Garmin GTN 6XX/7XX units using Main Software Version 5.10 through Version 5.13.

PILOT ACTION

Do not use the Preview key on the Catalog Flight Plan Menu.

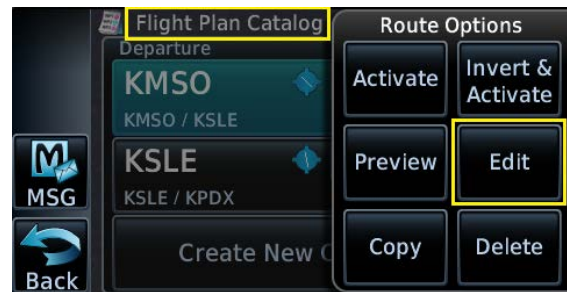

Figure 1: Catalog Flight Plan Menu

ISSUE

Editing a Catalog Flight Plan after previewing the Catalog Flight Plan from the “Catalog Flight Plan Menu” may cause changes to the Active Flight Plan.

Example:

1. Select a flight plan from the Flight Plan Catalog, then select **Edit** from the Route Options menu to modify the cataloged flight plan.

2. **NOTE:** All of the data fields for the cataloged flight plan are displayed in white along with the caption "CATALOG".

Touch the **Menu** key.

3. Touch the **Preview** key to preview the cataloged flight plan.

4. Touch the **Back** key to return to viewing the cataloged flight plan.

5. **NOTE:** There may now be magenta data and/or arrows indicating that edits may affect the active flight plan. Magenta data fields and/or arrows should never be present when viewing a catalog flight plan.

Editing the cataloged flight plan may actually make edits directly to the active flight plan.

RESOLUTION

This issue will be addressed in future software revisions.
