

JEPPESEN[®]
NavData[®] Alert

!! URGENT !!

Date: 30 July 2018

Subject: Clovis, New Mexico
Cannon AFB (KCVS)
ILS or LOC Rwy 22 [I22] & [L22]
Cycles 1808 & 1809

Incorrect Missed Approach Coding

Jeppesen NavData for cycle 1808, effective 19 July 2018, and cycle 1809, effective, 16 August 2018, contains incorrect NavData coding for the missed approach procedure of the ILS or LOC Rwy 22 [I22] & [L22]. The fix ident JAMBI should be JEBES. The position of the fix JEBES is CVS TAC R-220/D6.0 CVS TAC.

**WE STRONGLY URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO
APPROPRIATE CREW MEMBERS OR CUSTOMERS IMMEDIATELY!**

Revised coding will appear in Jeppesen NavData for cycle 1810, effective 13 Sep 2018. Until then an entry will appear in the NavData Change notices, and this Alert will be posted on the Jeppesen Web site. <http://www.jeppesen.com/company/alerts/alerts.jsp>

Please refer to the Cannon AFB; Clovis, N Mex (KCVS) 31-3 chart dated 3 NOV 17 (effective 9 November 2017) for valid information.

If you have questions concerning this NavData Alert, please contact Jeppesen Technical Support at:

Phone: 1-303-328-4445

E-mail: navdatatechsupport@jeppesen.com

NavData Alerts are published to advise users of significant issues in Jeppesen navigation data which may affect flight operations or safety. They are distributed to affected ARINC 424 NavData users (avionics companies and other raw data users) and airlines receiving NavData directly from Jeppesen. Alerts are not distributed by Jeppesen to individual airline, business aviation or general aviation pilots, but are available to them on the Jeppesen Web site, www.jeppesen.com. Different avionics equipment and computer systems use and display NavData and data derived from NavData differently. Avionics users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.
