

**JEPPESEN<sup>®</sup>**  
**NavData<sup>®</sup> Alert**

**!! URGENT !!**

**Date:** 15 November 2018

**Subject:** Ansbach, Germany  
Ansbach AHP (ETEB)  
COPTER RNAV (GPS) Rwy 26  
COPTER NDB 264  
Cycle 1812

***Procedure Coding Out-of-Date***

Jeppesen NavData for cycle 1812, effective 8 November 2018, contains outdated procedure coding for the COPTER RNAV (GPS) Rwy 26 & COPTER NDB 264 procedures. Procedure source was received after the date specified by ICAO for aeronautical information distribution, and as a result, procedure coding could not be updated in cycle 1812 NavData.

**THEREFORE, DO NOT USE THE COPTER RNAV (GPS) Rwy 26 & COPTER NDB 264 PROCEDURE CODING IN CYCLE 1812 NAVDATA.**

Revised coding will appear in Jeppesen NavData for cycle 1813, effective 6 December 2018. Until then an entry will appear in the NavData Change Notices, and this Alert will be posted on the Jeppesen Web site. <http://www.jeppesen.com/company/alerts/alerts.jsp>

**WE STRONGLY URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO APPROPRIATE CREW MEMBERS OR CUSTOMERS IMMEDIATELY!**

If you have questions concerning this NavData Alert, please contact Jeppesen Technical Support at:

E-mail: [navdatatechsupport@jeppesen.com](mailto:navdatatechsupport@jeppesen.com)

NavData Alerts are published to advise users of significant issues in Jeppesen navigation data which may affect flight operations or safety. They are distributed to affected ARINC 424 NavData users (avionics companies and other raw data users) and airlines receiving NavData directly from Jeppesen. Alerts are not distributed by Jeppesen to individual airline, business aviation or general aviation pilots, but are available to them on the Jeppesen Web site, [www.jeppesen.com](http://www.jeppesen.com). Different avionics equipment and computer systems use and display NavData and data derived from NavData differently. Avionics users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.
