AVIATION SERVICE DOCUMENT NOTIFICATION

TO: Garmin G1000[®] NXi King Air 200/300 Series Owner and Operators
DATE: December 10, 2021
SUBJECT: G1000 NXi STC Software Update for 200/300 Series Aircraft
CERTIFICATION AUTHORIZATION: STC SA01535WI-D

COMPLIANCE

Optional: This STC Service Bulletin may be incorporated at the owner's discretion.

PURPOSE

This service bulletin provides notification of an available update to System Software Version 2286.14 and includes the following changes:

- Support for -05 GEA[™] 71B LRU (allows removal of existing Meggitt Signal Conditioners)
- Support for -01 GTX[™] 345R LRU (end-of-life planning only, no functional change)
- Improvements to EIS transient indications for Prop RPM, Torque, and ITT
- Addition of new features:
 - Standby Flight Plans
 - (Advisory) VNAV Guidance for Non-Precision Approaches
 - Fast Find
- Support for direct (analog) interface to Collins ALT-50A or ALT-55B Radio Altimeter
- GSU 75 software update to address susceptibility to reset in certain ground circumstances when operating without GPS aiding
- GSA 9XXX software and Rudder Boost performance updates (300/B300 only)
- Gain file updates for VNAV acknowledgment timeout and transition to approach force capture threshold improvements
