

GARMIN®

FliteCharts Data Alert 25025

TO: Users of Garmin Pilot™ Mobile Australia for iOS using Australia FliteCharts® and the Garmin Navigation Database for Garmin Pilot

DATE: June 3, 2025

CYCLE: 2505

SUBJECT: FliteCharts at Airports inside Melbourne (YMMM) FIR Inaccessible

PRODUCT AFFECTED

Garmin FliteCharts, when used with the Garmin Navigation Database, is affected.

NOTE

Customers using Jeppesen Navigation Databases are not affected.

DESCRIPTION

FliteCharts at airports inside the Melbourne FIR (YMMM) may not be accessible to some users of Garmin Pilot Mobile Australia.

PILOT ACTION

Exercise caution when using Garmin Pilot for FliteCharts at any airport in the Melbourne FIR.

RESOLUTION

An updated Garmin Navigation Database for Garmin Pilot is now available which addresses this issue for customers using Garmin Pilot version 24.7.0 and later. Garmin Pilot will automatically download it for any user that currently has the Garmin Navigation Database selected.

For Garmin Pilot (iOS) Australia customers using a version earlier than 24.7.0, either temporarily activate the Jeppesen Navigation Database within Garmin Pilot or identify an alternative source of the chart. A permanent resolution is expected in cycle 2507, effective July 10, 2025.

Alerts are written for the currently effective cycle and next cycle. It is possible that data from prior cycles is also affected. Garmin recommends using the latest effective data cycle.

Garmin requests the flight crew report any observed discrepancies related to database information. These discrepancies could come in the form of an incorrect procedure, incorrectly identified terrain, obstacles, fixes, or any other displayed item used for navigation or communication in the air or on the ground. Go to [FlyGarmin.com](https://flygarmin.com) and select "Aviation Data Error Report."
